The Gold Standard in Burns Management

Most Proven concept for more than a Decade

STERILE COLLAGEN SHEETS
In Wet Form (Bovine Origin)
Available in a sterile preserving medium, ready for use in Burns & Wounds;
Gamma Sterilized.
Sizes:
5x5cm, 10x10cm, 10x20cm, 10x25cm, 15x30cm & 20x40cm

STERILE MESSED COLLAGEN SHEETS
In Wet Form (Bovine Origin)
The idea of meshing is not to effect expansion of the sheets but
as a choice to treating surgeons for usage on exudating/infected
Burns & Wounds;
Gamma Sterilized.
Indications & Precautions similar to Köllagen®.
Sizes:
5x5cm, 10x10cm, 10x20cm, 10x25cm, 15x30cm & 20x40cm

STERILE COLLAGEN SHEETS
In Dry Form (Bovine Origin)
Ready for usage in Burns & Wounds; No pre-treatment with
normal saline is required but the wound bed is to be wet with
normal saline before application.
Gamma Sterilized.
Indications & Precautions similar to Köllagen®.
Sizes:
5x5cm, 10x10cm, 10x20cm & 15x30cm

Köllagen®

Savings on huge dressings, IV fluids, Proteins
Savings on Analgesics
Savings on Antibiotics because complications like septicemia is avoided
Savings on time & energy for Doctors and Nursing staff
Reduces Hospital stay
Overall cost effective & most economical

INDICATIONS FOR USE
- 2nd degree superficial and deep dermal burns
- 3rd degree burns as a temporary cover after Escharectomy / Tangential excision
- Skin Donor Sites
- Traumatic loss of skin cover
- Temporary wound cover in major open fractures before definitive flap cover
- Chronic skin ulcers
- Shallow pressure sores
- Leprosy ulcers
- Dermabrasion areas
- Protective cover over widely meshed autografts

DIRECTIONS FOR USE
- Denuded areas should be thoroughly cleaned of external contamination
- Infected wound should be thoroughly debrided
- Select the right dimension of Collagen sheet for application
- Squeeze out the preserving medium from Köllagen® / Köllagen-M® sheet and then rinse in normal saline before application
- Apply the sheet firmly on the raw area and ensure that the air bubbles are removed for an effective adhesion
- Option of a secondary dressing is left to the doctor’s choice. A light gauze dressing over a non-adherent tulle may be opted.
- Collagen sheet peels off as the wound heals & epithelialization occurs; one can place a saline moist pad over Collagen dressing for few minutes to facilitate easy removal
- For Chronic Skin Ulcers: 2 to 3 applications of Collagen dressing in the interval of about 4 days after a thorough cleaning each time enhances the healing process

SALIENT FEATURES
- Single application on clean wounds
- Breathes like skin
- Effective barrier against infection
- Immediate pain relief
- Quick and firm adherence
- Promotes epithelialization
- Protects regenerating epithelium
- Preserves the local heat
- Stimulates healthy granulation
- Rapid and effective wound healing
- Non-Toxic & Non-immunogenic
- Biocompatible as per EN ISO 10993 Standards

PRECAUTIONS & WARNINGS
- Grossly infected wound may reject the collagen cover
- On application of Collagen Sheet on infected sites, care should be taken to inspect the wound condition frequently and change of dressing is recommended after cleansing with normal saline
- Avoid in patients hypersensitive to Collagen
- The product will not be sterile when the packing is damaged during transit
- Store at normal room temperatures

SAVINGS......
- Savings on huge dressings, IV fluids, Proteins
- Savings on Analgesics
- Savings on Antibiotics because complications like septicemia is avoided
- Savings on time & energy for Doctors and Nursing staff
- Reduces Hospital stay
- Overall cost effective & most economical
